WELLESLEY COLLEGE,

WELLESLEY, MASSACHUSETTS.

FOUNDATION AND PURPOSE.

WELLESLEY COLLEGE was established for the purpose of furnishing to young women who desire to obtain a liberal education such advantages and facilities as are enjoyed in institutions of the highest grade. The first building of the College, erected and equipped under the supervision and through the personal means of the founder, was opened to students in 1875, with the announced purpose "of giving to young women opportunities for education equivalent to those usually provided in colleges for young men." Throughout his work the founder aimed to put into visible form his ideal of the higher education for women, "the supreme development and unfolding of every power and faculty."

By the charter, granted by the Commonwealth of Massachusetts, "the corporation of Wellesley College is authorized to grant such honorary testimonials, and confer such honors, degrees and diplomas, as are granted or conferred by any University, College, or Seminary of learning in this Commonwealth; and the diplomas so granted shall entitle the possessors to the immunities and privileges allowed, by usage or statute, to the possessors of like diplomas from any University, College, or Seminary of learning in this Commonwealth."

In accordance with the spirit of the founder the College is undenominational, but distinctively and positively Christian in its influence, discipline, and instruction.

The members of the College meet daily for morning prayers in the beautiful chapel presented in 1899 by Miss Elizabeth G. Houghton and Mr. Clement S. Houghton, as a memorial to their father. Services on Sunday are conducted in this chapel by preachers of different denominations. At all these services and at vespers on Sunday the singing is led by a trained choir of students under the direction of the professor of music.

The Wellesley College Christian Association, organized to promote religious life, to arouse an intelligent interest in social reforms, and to foster interest in home and foreign missions, meets weekly for prayer and religious instruction in the chapel given by the founder of the College.

The department of Biblical History, Literature, and Interpretation affords the systematic study of the Bible required of all students.

LIBRARIES.

THE LIBRARY of the College, endowed by Eben Norton Horsford, now numbers 51,752 carefully selected volumes, including collections enumerated below. The General Library is open on week-days from 7 A. M. to 9.20 P. M., and on Sundays from 9 to 11 A. M. and from 2 to 6 P. M. Students have free access to the shelves. The library is fully catalogued by author and subject entries, and the most recent and useful bibliographical aids are provided; special effort is made by the librarians to train students in thorough methods of research. A practical course of instruction in Bibliography is given each year in connection with college courses in literature, art, philosophy, history, and economics.

One hundred and sixty-five American, English, French, and German periodicals are taken for the General Library. The list includes the most important representatives of the branches of instruction covered by the college curriculum. About thirty-seven daily, weekly, and monthly journals are taken for the reading room.

THE GERTRUDE MEMORIAL LIBRARY, established by Mr. A. A. Sweet, the MISSIONARY LIBRARY, and other collections in the General Library, furnish 4,391 volumes for Biblical study and religious reading.

THE LIBRARY OF AMERICAN LINGUISTICS, a special gift from Mr. Horsford, numbers 1,420 works, including the valuable collection made by Major J. W. Powell.

The following collections are located in the laboratories of the departments to which they belong:—

Art Library, 1,659 volumes.

Library of Botany, 1,856 volumes.

Library of Physics, Physical Astronomy, Microscopy, and Physical Geography, 2,363 volumes.

Library of Zoology and Physiology, 1,805 volumes.

Library of Chemistry, 1,029 volumes.

In the smaller houses, libraries of literary, historical, and religious works are accumulating through private generosity.

THE FARNSWORTH ART BUILDING AND ART COLLECTIONS.

The Farnsworth Art Building, the gift of the late Isaac D. Farnsworth, was opened in September, 1889. Besides a lecture room, galleries for collections, and studios for those engaged in drawing and painting, a special feature in the plan of the building is the arrangement of laboratories and libraries, so that the books and art material relating to particular subjects and periods can be made immediately available to general students.

The Art Collection consists of a large number of photographs, engravings, etchings, and drawings; a small collection of paintings; copies of ancient armor; a few ceramics, coins, and pieces in bronze and iron; a small collection of casts from the antique; thirty-six pieces of pottery from an ancient cemetery on the Isthmus of Panama, the gift of Mrs. J. S. Lamson; the James Jackson Jarves collection of laces, embroideries, and vestments; a collection of Indian baskets, the gift of Mrs. Rufus S. Frost, to which additions are constantly made, and the Stetson collection of modern paintings in oil.

Thirty-eight large photographs from the Raphael cartoons in the South Kensington Museum, the gift of Mr. John C. Gray, and over four thousand other photographs have been added to the art collections during the past four years.

MUSIC HALL.

The department of Music occupies Music Hall, which contains thirty-eight music rooms, and a hall for lectures and choral singing. An ample equipment of musical instruments is furnished for the use of students.

LABORATORIES AND SCIENTIFIC COLLECTIONS.

Chemistry.

The building erected for work in Chemistry contains a large laboratory for General Chemistry, with lockers for two hundred students; separate rooms for analytical work in qualitative and

quantitative branches ; and a room specially arranged for making organic preparations. All of the rooms are well lighted, conveniently arranged, and thoroughly equipped with modern appliances for successful work. The building contains also a reading room, and a large lecture room admirably arranged for experimental illustrations.

Geology and Mineralogy.

The mineralogical specimens are arranged in three collections. One collection is exhibited in glass cases, and illustrates the variety and finer qualities of mineral specimens ; also by its arrangement with labels for the groups into which it is divided, it shows the classifications of minerals, and, to some extent, their association.

Another collection is used for reference. It contains well-characterized specimens of the more common species. The specimens are labeled and arranged in drawers, and the collection is always accessible to students taking Mineralogy.

There is a third collection, which is used for teaching purposes. It comprises smaller but well-selected specimens, which are systematically arranged in small wooden trays with numbers, but without labels. During an exercise each student has one of these trays, which presents objectively the subject of the lesson.

The room containing these collections is supplied with tables equipped with appliances for testing specimens and laboratory work.

The geological collection of specimens used in teaching the kinds of rocks, rock structures, the fossil evidences of life and their succession in past times, is so arranged in cases and labeled that it permanently illustrates these topics.

Physics.

The department of Physics occupies a convenient lecture room, provided with arrangements for sunlight and lantern projection and adequate apparatus for illustrative experiments.

Laboratories for students are equipped with instruments adapted to a wide range of work. Rooms are especially fitted for photometry, photography, spectroscopic work, and electrical measurements. A workshop is provided with lathe and tools. A steam-engine and two dynamos are connected with the laboratories.

The Whittin Observatory has been opened for students' work. It is supplied with a twelve-inch refracting telescope with micrometer, spectroscope, and photometer attachments, also a concave grating spectroscope. The Observatory is equipped for laboratory work both in the astronomy of measurement and in astrophysics.

Botany.

For the use of students in morphological, histological, and physiological work there are three laboratories, each of which is thoroughly equipped for its special purpose. The laboratory for advanced work has also the necessary physical and chemical apparatus, and such other appliances as are requisite to enable students to carry on independent research.

The collections illustrative of Botany include: the herbarium, containing upward of six thousand phanerogams and about six thousand and five hundred cryptogams; a generic collection mounted under glass; a collection of woods, fruits, and economic vegetable products, and a set of drugs fully illustrating the pharmacopœia; two hundred charts by Henslow, Kny, Dodel, Tschirch, and others; a collection of Auzoux's botanical models, illustrating the structure of both flowering and flowerless plants; Brendel's glass models of cryptogams.

In addition to the working collections a permanent museum is being arranged, which now numbers more than five thousand specimens.

Zoology.

There are three laboratories for the study of Zoology and Animal Physiology. They are equipped with microscopes, microtomes, incubator, and the more special pieces of apparatus for physiological work.

The Zoology Museum contains a typical collection of both vertebrates and invertebrates, and a considerable number of models by Ziegler, Blaschka, Auzoux, and Deyrolle. There are also excellent collections of the local birds and of insects.

Psychology.

The work of the laboratory is carried on in seven rooms (among which are dark-room and lecture-room) with electrical connections. The equipment includes Sanford's chronograph and vernier chronoscope; a chronoscope with electrical connections upon the

principle of the vernier ; an electric motor ; a pneumograph, tambours, and a kymograph ; Lough's electrically actuated pendulum, to which is attached the time-marker, an electric pen, used with the kymograph ; Zwaardemaker's clinical and fluid-mantle olfactometers, with a large collection of smell material ; a color-wheel, a campimeter, a Wheatstone stereoscope ; the Hering simultaneous contrast apparatus ; the apparatus of Münsterberg and of Titchener for the localization of sound ; tuning-forks and sonometers ; a pressure-balance, æsthesiometers, graduated weights, etc. ; and apparatus for special investigations. Students may have the use of models and plates of the brain, and of dissecting instruments.

Mathematics.

The collection of mathematical models consists of a set of models of simple solids, surfaces of the second and higher orders, and circular sections of surfaces of the second order. They are executed in wood, thread, card, and plaster.

CONCERTS AND GENERAL LECTURES.

The College provides annually addresses of special interest to the members of various departments, but open to the college at large. The Kate Howard Furness Fund has been established to provide annually a lecture or reading on a Shakespearean subject. The Monroe Fund is intended to furnish each year two lectures or readings in the interest of the department of Elocution.

Frequent recitals and concerts are given by instructors in the department of Music, by advanced students, and by distinguished musicians from Boston and elsewhere. These concerts are free, but it is expected that all who are able will contribute to the Concert Fund.

HEALTH PROVISIONS.

Wellesley is known as one of the most healthful towns in Massachusetts. The college grounds include more than three hundred acres, and give ample opportunity for exercise and recreation. Lake Waban affords a most attractive place for boating and skating. The health of students is considered of primary importance. In the construction of buildings this end has constantly been kept in view. Everything possible has been done to give an abundance of light, sunshine, fresh air, and pure water. The drainage, natural and artificial, is excellent.

Two professionally trained Health Officers are in residence, one at College Hall, the other at Eliot Cottage in the village. The Health Officers, the Director of Physical Training, and the President of the College constitute a Board of Health. Two hospital wards, with the constant attendance of a trained nurse, are maintained in College Hall ; there is also an emergency ward in an isolated building. No charge is made for the ordinary services of health officers or resident nurse.

Freshmen are required to take a course in Physiology and Hygiene, one appointment per week for a year.

PHYSICAL TRAINING.

Three hours per week of physical training are required in the freshman and sophomore years. Each freshman receives a thorough physical examination, which includes measurements and strength tests. A second examination is made at the close of the sophomore year.

A limited number of upper-class students can be accommodated in the gymnasium.

The gymnasium is equipped with apparatus for Swedish educational gymnastics. The playstead furnishes opportunity for organized games, which are under the supervision of the director of physical training. Instruction in rowing is given and instruction in riding and fencing is offered. Instruction in swimming can be obtained in a bath near Wellesley.

RESIDENCE.

College Hall, with three dining rooms, accommodates two hundred and sixty-nine persons ; Stone Hall, with four dining rooms, one hundred and two ; Wilder Hall, fifty ; Freeman Cottage, forty-nine ; Wood, forty-nine ; Norumbega, thirty ; Eliot, thirty-one ; Simpson, twenty-two ; Waban, eleven ; Fiske, thirty-four. Each building contains single rooms as well as suites for two students. All the rooms are fully furnished and supplied with electric lights or student lamps.

EXPENSES.

The charge for board and tuition to all students living in the college buildings and taking the regular college course, without music, is \$400 per year. Such students will pay \$250 at the open-

ing of the College in September. Of this amount \$175 is for tuition, and \$75 for board. At the beginning of the second semester the balance for board (\$150) is due.

Students who are not lodged in the college buildings make their entire tuition payment (see below) at the time of the opening in September. These payments must be made before the student may take her place in the class room. No exception will be made to this rule without a written permission from the Treasurer.

An application fee of \$10 is required from all candidates for admission, and no application is recorded until the fee is received (see page 25). This fee will be credited to the student, and a corresponding deduction made on her first payment. If the student decides to withdraw, the fee will be returned provided notification of withdrawal is received thirty days before the beginning of the college year. A student who postpones entrance until the year following the one for which she first applied may transfer her application fee.

 *Checks or money orders should be made payable to Wellesley College.*

Tuition.

The charge for full tuition to all students, whether living in college buildings or not, is \$175 a year.

Tuition must always be paid in advance, and is not subject to return or deduction.

Students who are permitted to take *seven hours or less* of class-room work per week, and *who do not live in the college buildings*, pay tuition by the course as follows: For a one-hour course, \$20; a two-hour course, \$40; a three-hour course, \$60. Payment is due at the beginning of the year. No charge is made for tuition in courses in Biblical History.

An additional charge is made for materials in the following laboratory courses: \$5 for each laboratory course in Botany, Chemistry, Zoology, or Physics, and \$2.50 for the course in Mineralogy. Every student should also reckon on the expenditure of \$10 to \$25 annually for the purchase of books. At the time of taking the degree a diploma fee is charged. This is \$5 for the B.A. degree and \$25 for the M.A. degree. At the time of taking a certificate, a certificate fee of \$3 is due.

Tuition and Other Charges in the Department of Music.

For instruction for the college year in Pianoforte, Organ, or Violin, two lessons per week	\$100 00
One lesson per week*	50 00
(Lessons forty-five minutes each.)	
Two half-hour lessons per week	75 00
For instruction for the college year in Vocal Music, two lessons per week	100 00
For use of the Pianoforte, one hour daily, for the year	10 00
For two hours daily	20 00
For three hours daily	30 00
For use of the Pipe Organ in Music Hall, one hour daily, for the year	15 00
For two hours daily	30 00

Tuition in music must always be paid in advance, and is not subject to return or deduction. Special arrangements may be made for lessons on instruments not mentioned above.

Board.

A student vacating a room before the close of the year, or relinquishing a room reserved for her at the beginning of the year, will be charged for board at the rate of \$7 a week until the vacancy has been filled by an incoming student. Therefore notice of an intention to withdraw should be given at the earliest possible moment. No deduction is made for absences during the year. Application for rooms in the college buildings should be made at least two years in advance of the time at which the student is expected to enter. A fee of \$10 is required for recording application, and no application is recorded until the fee is received.

The application takes the date at which the application fee is received (see page 24).

Until May 1st, but not after that date, applications from former students will take precedence of those of new students in the matter of rooms. Board can be obtained in private families in the village for \$6 per week and upward. Information regarding boarding places may be obtained by addressing the Registrar.

*Two lessons a week insure much more rapid progress, while by comparison with one weekly lesson they do not involve any material increase in the time spent in preparation.

A limited number of students can arrange for board at the College during the Christmas and spring vacations ; the charge is \$7 per week.

 *No student can receive a diploma until a satisfactory settlement of all her college dues has been made.*

SCHOLARSHIPS, ETC.

A. FOR GRADUATES.

Thirty scholarships to the value of \$175 per year have been established for the benefit of approved candidates for the M.A. degree. Applications for these scholarships should be addressed to the Chairman of the Committee on Graduate Instruction, Wellesley College, Wellesley, Mass.

The (second) Helen Day Gould Scholarship, founded in 1899, by Helen Miller Gould ; raised to \$10,000 by Miss Gould in 1901.

The Alice Freeman Palmer Scholarship of \$5,000, founded in 1899, by Mrs. David P. Kimball.

The Mary Elizabeth Gere Scholarship of \$5,000, founded in 1899, by Mary Elizabeth Gere.

The Ann Morton Towle Memorial Scholarship Fund of \$5,000, established in 1901 by bequest of George Francis Towle.

The Dana Scholarship of \$5,000, founded in 1901 through the gift of Charles B. Dana.

The (third) Helen Day Gould Scholarship of \$10,000, founded in 1901 by Helen Miller Gould.

The George William Towle Memorial Scholarship Fund founded in 1901 by bequest of George Francis Towle.

As its means allow, the Students' Aid Society also affords help to those who cannot from their own resources meet the entire expense of the college course. In many cases money is loaned to students without interest, in the expectation that whenever they are able they will repay the Society ; assistance is often given partly in gifts and partly in loans.

The funds at the disposal of the Society are wholly insufficient to meet the wants of applicants. Contributions of any amount

will be gladly received, and should be sent to the Treasurer of the Society, Mrs. Pauline A. Durant, Wellesley, Mass. All applications for assistance must be made by letter addressed to the Secretary of the Students' Aid Society, Wellesley, Mass., before the first of May preceding the college year for which the aid is needed.

In two cottages a reduction of \$100 is allowed on payment for board, under certain conditions.

ADMISSION.

Admission to the Freshman Class.

Students are admitted either by examination (see pages 30 and 31) or by certificate (see pages 31 and 32).

Every candidate for a degree must offer for admission to the freshman class the following subjects: English, History, Algebra, Plane Geometry, Latin, and in addition the maximum requirement in a second language (which may be either Greek, or French, or German), together with the minimum requirement in a third language or in one of the following sciences: Chemistry, Physics, Zoology. For full details regarding requirements in these subjects see pages 32 to 39.

The subjects prescribed for admission are divided into three groups, A, B, C, as follows:—

Group A. Rhetoric, History, Plane Geometry, Cæsar, Vergil and Prosody, Cicero, Anabasis, Greek Grammar, Iliad, German (reading, poetry, and technical grammar of maximum requirement), and French (reading, poetry, and technical grammar of maximum requirement).

Group B. Chemistry, Physics and Zoology.

Group C. English Literature and Composition, Latin Prose Composition, Greek Prose Composition, French Prose Composition and Conversation of maximum requirement, German Prose Composition and Conversation of maximum requirement, Greek, French and German minimum requirements, and Algebra.

Final examinations in subjects of *Group A* may be taken *at any time* during the college preparatory course. Final examinations in subjects of *Group B* must be taken not earlier than *fifteen months before entrance* in September. Final examinations in sub-

jects of *Group C* must be taken *not earlier than during the school year immediately preceding admission to college.*

 The above applies to final examinations held by principals of schools, preliminary to granting certificates, as well as to the admission examinations held by the College.

Candidates will not be admitted if conditioned in two, or heavily conditioned in one, of the following subjects: Latin, Greek, French, German, Mathematics, Chemistry, Physics, Zoology.

A candidate for admission must be at least sixteen years of age, and must present satisfactory evidence of good moral character and good health. A blank form for the certificate of health will be sent in July to all registered applicants for admission.

The student who has met all entrance requirements is qualified for immediate matriculation for the Baccalaureate degree in Arts.

All communications concerning admission should be addressed to the Dean of Wellesley College, Wellesley, Mass.

ADMISSION BY EXAMINATION.

Examinations for admission are offered at the College in June and September of each year. Such examinations may be appointed in June in any city where they are desired by two or more candidates. Applications for these local examinations should be made *before April 1st* to the Dean of the College. Examinations are held in September *in Wellesley only.*

ADMISSION BY CERTIFICATE.

Any school whose equipment and curriculum enable it to prepare students for the freshman class, upon complying with the regulations stated below, may receive the right to give a certificate of scholarship which shall exempt the candidate from college examinations for admission in the subjects satisfactorily covered by the certificate.

Right of Certification.

1. If a school has not the right of certification and the principal wishes to obtain this privilege, he should apply to the Dean of the College between October first and April first of any year. In response to this application a blank form will be sent, which the principal is requested to fill out and return, sending with it a catalogue or circular of the school.

During the interval between April first and October first applications for the right of certification will not be considered by the Board of Examiners.

2. The school is considered to be on probation during the first year of the first candidate. The right of certification may be withdrawn at any time from any school which fails to give complete and satisfactory preparation.

Certificate of Scholarship.

1. The principal of the preparatory school must present, upon a blank form furnished by the College, a certificate of scholarship for each candidate.

2. All certificates must be forwarded in time to be received at the College *by July 1st*, unless special arrangements have been made with the Board of Examiners. On or before August 1st

each candidate will be informed of the decision with regard to her certificate.

3. All certificates must show distinctly that the candidate has met in detail the requirements as published in the current Calendar. Whenever any variation has been allowed, the work done must be specifically stated and offered as an equivalent, to be accepted or refused. *Attention is called to the division of the admission subjects into Groups A, B, C, stated on page 29, and to the fact that final examinations in the subjects of Groups B and C must be taken within a specified time of admission.*

4. All certificates must be signed by the principal of the school, and countersigned by the assistants who have instructed the candidate.

5. Supplementary certificates will not be accepted. All work completed after July 1st must be tested by examination at the College in September.

6. The candidate who has received the certificate of a principal will not be exempt from the examinations for admission in any particular subject, unless her certificate shows that she has satisfactorily accomplished the full amount of work required in that subject. Any student whose certificate is found on July 1st to be seriously deficient, may be refused the privilege of taking examination the following September.

REQUIREMENTS FOR ADMISSION.

1. English.

Rhetoric.—Choice of Words, Construction of Sentences and of Paragraphs, Outlines of Themes.

Text-books recommended : Scott and Denney's Composition-Rhetoric ; Lewis's First Book in Writing English ; J. F. Genung's Outlines of Rhetoric ; A. S. Hill's Foundations of Rhetoric, and as companion book, Huber Gray Buehler's Practical Exercises in English ; W. G. Mead's Elementary Composition and Rhetoric. The first half of Genung's Practical Elements of Rhetoric will be accepted.

Composition.—The subjects for the examination in Composition will be taken from the English Literature required for the year. The form of the examination will usually be the writing of a paragraph or two on each of several topics, to be chosen by the

candidate from a number set before her in the examination paper in English Literature. The treatment of these topics is designed to test the candidate's power of clear and accurate expression, and will call for only a general knowledge of the substance of the books. In place of the whole or a part of this test, the candidate may be allowed to present an exercise book, properly certified by the instructor, containing compositions or other written work done in connection with the reading of the books.

To meet the requirement in composition, the student should have practice in writing equivalent to fortnightly themes during the first two years and weekly themes during the last two years of the preparatory course. No applicant will be accepted in English whose work is notably defective in point of spelling, grammar, idiom, punctuation, or division into paragraphs.

Literature.—The Wellesley requirement is that adopted by the Commission of New England Colleges.

A. Reading.

Certain books are set for reading. The candidate is required to present evidence of a general knowledge of the subject-matter, and to answer simple questions on the lives of the authors.

The books set for this part of the examination are :

In 1902 : Shakespeare's *The Merchant of Venice* ; Pope's *Iliad*, Books I., VI., XXII., and XXIV. ; the *Sir Roger de Coverley Papers* ; Goldsmith's *The Vicar of Wakefield* ; Coleridge's *The Ancient Mariner* ; Scott's *Ivanhoe* ; Cooper's *The Last of the Mohicans* ; Tennyson's *The Princess* ; Lowell's *The Vision of Sir Launfal* ; George Eliot's *Silas Marner*.

In 1903, 1904, and 1905 : Shakespeare's *The Merchant of Venice* and *Julius Cæsar* ; the *Sir Roger de Coverley Papers* ; Goldsmith's *The Vicar of Wakefield*, Coleridge's *The Ancient Mariner* ; Scott's *Ivanhoe* ; Carlyle's *Essay on Burns* ; Tennyson's *The Princess* ; Lowell's *The Vision of Sir Launfal* ; George Eliot's *Silas Marner*.

B. Study and Practice.

This part of the examination presupposes the thorough study of each of the works named below. The examination will be upon subject-matter, form, and structure.

The books set for this part of the examination are :

In 1902, 1903, 1904, and 1905: Shakespeare's *Macbeth*; Milton's *Lycidas*, *Comus*, *L'Allegro*, and *Il Penseroso*; Burke's *Speech on Conciliation with America*; Macaulay's *Essays on Milton and Addison*.

NOTE.—In the Wellesley examination it is taken for granted that candidates will have learned by heart illustrative passages from all poems read.

2. History.

A full year course with at least three recitations per week in *one* of the following subjects :—

The History of Greece to the death of Alexander, with due reference to Greek life, literature, and art.

The History of Rome, the Republic and Empire to the accession of Commodus.

English History, with due regard to social and political development.

American History, with the elements of Civil Government.

In the subject chosen, the student should acquire accurate knowledge of the history as presented in a standard text-book of not less than 300 pages, and should read such fuller authorities as may be available, in amount not less than 500 pages. Some practice in drawing maps to illustrate territorial changes, in making digests of lectures and reading, and in preparing verbal or written reports on subjects assigned for individual investigation is essential to successful work.

Students presenting themselves for examination are expected to bring note-books, maps, and essays, that may serve as supplementary evidence of the character of their preparation.

3. Mathematics.

Algebra.—Factors, Common Divisors and Multiples, Ratio and Proportion, Theory of Exponents, Radicals and Equations involving Radicals, Inequalities, Quadratic Equations (including the theory), Imaginary Quantities, Binomial Theorem, Arithmetic and Geometric Progressions.

Plane Geometry.—As found in Chauvenet, or its equivalent.

Deficiency in preparation usually results from one or more of the following causes: the use of text-books which are too elementary, insuffi-

cient time spent in preparation, neglect of exercises in original demonstration in Geometry, and of reviews in both Algebra and Geometry. One and one-third years, with daily recitations, is the shortest time in which satisfactory preparation can be made in Algebra, and one year with daily recitations is the minimum in Geometry. It is strongly urged that there be constant exercise in original demonstration in Geometry, with frequent written examinations in both Algebra and Geometry, the problems proposed being drawn from other sources than the text-books.

4. Latin.

Grammar, including Prosody.

Prose Composition.

One of the standard text-books in this subject should be completed, and additional practice given in the writing of connected passages.

Cæsar, Gallic War, four books.

Cicero, seven orations, or six if the Manilian Law be one.

Vergil, *Æneid*, six books.

Candidates must be prepared to translate at sight Latin of average difficulty and to write in Latin connected passages based upon Cæsar and Cicero.

Equivalents are accepted, but verse is not accepted in place of prose, nor anything instead of the required translation of English into Latin.

The study of Greek is strongly recommended to candidates who plan to elect courses in Latin in college.

5. Greek.

Maximum Requirement.

Grammar. *The etymology must be thoroughly mastered.*

Prose Composition. At least forty written exercises based upon the Greek of Xenophon, including connected passages and accompanied by a systematic study of the main principles of syntax.

Xenophon, *Anabasis*, three books.

Homer, *Iliad*, three books ; with scansion.

Candidates must be prepared to translate at sight both Attic and Homeric Greek of average difficulty, and to write in Greek a connected passage based upon Xenophon.

Particular attention should be given to the correct writing of Greek with the accents, to exercises both oral and written, and to the use of the blackboard for constant practice upon forms and constructions.

The teachers of Latin and Greek in the preparatory schools are urged to insist upon the use of good English in translation.

Ability to read at sight either easy French or German prose is of great advantage to all classical students.

Minimum Requirement.

Systematic study of etymology from Goodwin's or Hadley and Allen's Grammar, in connection with a book of First Lessons. Anabasis, about thirty pages. Practice in writing Greek.

This work requires at least one year, with five recitations per week. This preparation admits the student to course 14 in College, and these two courses complete the preparation for course 1 (see page 46).

6. French.

Maximum Requirement.

To meet the requirement in French the candidate must be prepared in the following :—

(1) Grammar : a knowledge of the etymology and the essential principles of syntax, especially the use of moods and tenses.

(2) Composition : familiarity with the commoner idioms, and ability to translate connected passages of easy English into French at sight.

(3) Reading : not less than five hundred duodecimo pages of classical and contemporary prose and verse from at least four standard authors.

(4) Conversation : ability to follow a recitation conducted in French, to answer questions in that language, and to repeat some short selections from French prose and poetry.

These results can be best attained by the use of the books indicated for College Courses 1 and 2, or their equivalents (see pages 56 and 57 of present Calendar).

The preparation for the maximum requirement in French should cover a period of at least two years, five recitations per week.

Minimum Requirement.

As the minimum requirement a student may offer either *A* or *B* :—

A. The first year of the maximum requirement, viz. :—

(1) Grammar : including the conjugation of the regular and the more usual irregular verbs.

(2) Composition: translation into French of connected passages of simple English.

(3) Reading: at least two hundred duodecimo pages from at least three different authors. Not more than one half of this should be from works of fiction.

(4) Conversation: Ability to answer in French questions on simple subjects and to repeat short selections from choice French poetry. French should be the language of the class room.

B. (1) Grammar as for minimum A.

(2) The ability to read easy prose at sight.

The student should translate, with careful attention to the grammar, at least three hundred pages from such works as *La Prise de la Bastille*, by Michelet; *La Mare au Diable*, by George Sand; *La Chute*, by Victor Hugo; or the prose of such authors as Souvestre, Daudet, and About. The selections should be made from at least four different authors.

Students meeting minimum requirement *B* may be admitted to course 16, but not to course 2 without additional preparation. The preparation for the minimum requirement in French should cover a period of at least one year, five recitations per week.

7. German.

Maximum Requirement.

To meet the maximum requirement in German the candidate must have:—

(1) A distinct German pronunciation, which may be acquired at the outset by a course in phonetics.

(2) A knowledge of the important rules of elementary grammar, which the student should be able to state in German, and to illustrate by original examples.

(3) Ability to understand spoken German, an easy lecture or novel, which will be acquired if German is made the language of the class room.

(4) Fluency in conversation upon simple topics, and knowledge of German idioms, which are gained by object lessons according to Pestalozzi's *Anschaungs Method*, and by constant speaking exercises.

(5) Ability to understand and recite some short specimens of choice lyric poetry.

(6) Ability to translate easy German at sight.

(7) Ability to translate easy English into German, to write simple compositions, and to use the German script.

These results can be obtained by the following course or its equivalents :—

Grammar: *Deutsche Sprachlehre*, by Wenckebach.

Prose composition: *German Composition*, by Wenckebach, pp. 1-109 and pp. 165-210.

Reading: *Deutsches Lesebuch*, by Wenckebach, pp. 1-126 and 167-247, studied according to the directions given in the preface. An easy story for practice in sight reading (*e. g.*, Meissner's *Aus meiner Welt*), a drama (*e. g.*, Lessing's *Minna von Barnhelm*), and Goethe's *Dichtung und Wahrheit*, three books.

Conversation: *Deutscher Anschauungs-Unterricht*, by Wenckebach, pp. 1-52, 78-82, 91-117, 128-161. Idioms, pp. 315-332 (see preface).

Poetry: *Die Schönsten Deutschen Lieder*, compiled by Wenckebach; the first five "Volkslieder," and numbers 2, 3, 8, 10, 14, 15, 18, 19, 20, 21, 22, 23, 26, 28, 30, 32, 33, 34, 37, 40, 42, 45, 46, 47, 50, 51, 52, 59, 60, 61, 62, 63, committed to memory.

The preparation for the maximum requirement in German should cover a period of at least two years, five recitations per week.

Minimum Requirement.

As the minimum requirement, a student may offer either *A* or *B*.

A. The first year of the maximum requirement, namely :—

(1) *Deutsche Sprachlehre*, pp. 1-150; *German Composition*, pp. 1-55; (2) Reading: *Deutsches Lesebuch*, pp. 1-125 and 167-247. Poetry committed to memory, pp. 220-224 in the *Lesebuch*; (3) Speaking exercises; *Deutscher Anschauungs-Unterricht*, pp. 1-36. Idioms, pp. 315-319.

B. The ability to read easy prose at sight.

The student should translate, with attention to the grammar, at least two hundred pages of such German texts as Andersen's *Bilderbuch ohne Bilder*, Fouqué's *Undine*, Chamisso's *Peter Schlemihl*.

The preparation for the minimum requirement in German requires at least one year, five recitations per week, and should not be crowded into a shorter time.

Equivalents will be accepted; but reading will not be taken in place of grammar, nor poetry for conversation, etc.

8. Chemistry.

Remsen's Introduction to the Study of Chemistry, Briefer Course ; or, the course outlined in the Report of the Committee on Secondary School Studies, pp. 127-137.

The preparation in Chemistry should cover at least one year, five recitations per week. In addition to an examination or certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must bear the endorsement of the teacher certifying that the notes are a true record of the student's work.

9. Physics.

The Harvard requirement in Physics ; or, the equivalent of the courses outlined in the Report of the Committee on Secondary School Studies, pp. 117-127 (National Educational Association, 1892).

The preparation in Physics should cover at least one year, five recitations per week. In addition to an examination or certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must bear the endorsement of the teacher certifying that the notes are a true record of the student's work.

10. Zoology.

Colton's Practical Zoology, except those parts which involve the use of the compound microscope. The student must be able to recognize the animals, and to make the dissections described in that book. It is suggested that the work be done from the biological standpoint, and the use of Jordan and Kellogg's Animal Life as supplementary reading is warmly recommended.

The preparation in Zoology should cover at least one year, five recitations per week. In addition to an examination or certificate of examination, the student will be required to present notebooks of laboratory work. These notebooks must bear the endorsement of the teacher certifying that the notes are a true record of the student's work.

Admission to Advanced Standing.

Candidates for advanced standing must fulfill the requirements for admission to the freshman class, and must also be prepared to be examined in the required studies previously pursued by the class which they wish to join, and in a sufficient number of electives to give full standing with that class.

Such candidates, if they come from other colleges, may present certificates of college work ; but it should be clearly understood that they are not thereby necessarily relieved from examinations.

Each candidate should apply for a statement of the credentials which she will need to present.

Candidates for advanced standing whose applications are filed *before May 1st* of the year in which they propose to enter, and whose credentials admit them *to sophomore or higher rank*, will take precedence of candidates for the freshman class in the assignment of rooms.

All correspondence should be addressed to the Dean of the College.

Admission of Students not Candidates for a Degree.

Opportunities for special study are offered to students who are not candidates for a degree, but are qualified to undertake college work.

Applicants who give satisfactory evidence of ability to pursue advanced courses of study may be admitted at the discretion of the Board of Examiners, provided that they satisfy the requirements of the departments which they propose to enter. It will be noted that opportunities of prosecuting work along special lines are thus open to persons of experience and success in teaching who possess the requisite qualifications for admission to college classes.

Applicants of less maturity and acquirement are not ordinarily admitted, but if such desire admission they must expect to meet, by examination or by certificate from an accredited school, the requirements prescribed for admission to the Freshman Class, or a full equivalent for them, and to satisfy such additional requirements as are prescribed by the departments which they propose to enter.

All courses, graduate as well as undergraduate, are open to special students, subject to the conditions stated by the various

departments; but every such student is expected to choose a primary subject to which she should devote the greater part of her time. A student who creditably completes a prescribed group of courses in two or more departments will be granted a certificate.

As the capacity of dormitories is not sufficient for candidates for degrees, special students cannot be lodged in the college buildings. Comfortable homes may be found in the village at about the same expense as in college dormitories.

Application for admission as a special student, with all required certificates, should be sent to the College before the first of July, if possible. All correspondence should be addressed to the Dean of the College.

College Examinations.

An examination period occurs at the end of each semester. At these periods, and also during the days of the admission examinations in September, examinations for the removal of conditions and deficiencies and for advanced standing may be taken.

A student desiring to remove a condition at either of the semester examination periods may be admitted to examination at either of these periods, provided she has given one week's notice to the department concerned. A student desiring to remove a condition during the days of the admission examinations in September must notify the Dean two weeks before the date set for the first admission examination. For examination for the removal of deficiencies or for advanced standing *special arrangements must be made.*

 The College reserves the right to require the withdrawal of students whose scholarship is not satisfactory.

DEGREES.

The following degrees will be conferred by the Trustees upon recommendation of the Academic Council:—

Bachelor of Arts.

Master of Arts.

Requirements for the B.A. Degree.

Every candidate for the B.A. degree must complete before graduation the equivalent of fifty-nine one-hour courses,* of which a certain number are required, the rest elective.

* A one-hour course is a course given once a week for one year.

I. REQUIRED. Courses in the following subjects are required as specified:—

Mathematics, one full course †; Philosophy, one full course; Physiology and Hygiene, one one-hour course*; Biblical History, the equivalent of four one-hour courses; English, the equivalent of four one-hour courses; Language, one full course; Natural Sciences, two full courses. The science courses must be in different departments. If a student offers science for admission only one full course of natural science is required in college.

Of the required subjects, Mathematics must be taken in the freshman year; Physiology and Hygiene in the freshman year; Biblical History, one hour per week in the freshman and sophomore years, two hours per week in the junior year; English, one hour per week in the freshman and junior years, and two hours per week in the sophomore year. Of the natural sciences, one must be taken before the junior year, the other may be elected at any time during the course; language may be taken in any year, but either a language or a science must be taken in the freshman year. Philosophy should ordinarily be taken before the senior year.

II. ELECTIVE. All of the fifty-nine hours not indicated in the above are elective, subject only to the restriction that the equivalent of eighteen one-hour courses must be taken in one of the following ways:—

- (a) Nine in each of two subjects, related or unrelated.
- (b) Nine in one subject, with nine divided between two tributary subjects.
- (c) Twelve in one subject, with six in a tributary subject.
- (d) Twelve in one subject, with six divided between two tributary subjects.

In general, required subjects may be counted in making up these eighteen hours; but course 1 in French, course 1 in German, and course 13 in Greek may not be so counted.

Except by special permission, a student may not take fewer than ten or more than fifteen hours per week in any one year.

* A one-hour course is a course given once a week for one year.

† A full course is a course given either three or four times a week for one year.

Requirements for the M.A. Degree.

Candidates for the degree of Master of Arts must be graduates of Wellesley College, or of some institution of satisfactory standing, and must give evidence of ability to carry on the work for the Master's degree.

The amount of work required of candidates for the M.A. degree consists of the equivalent of from nine to twelve one-hour courses chosen from the courses described in the circular of Graduate Instruction, and in addition either a thesis or a report or reports on one or more pieces of independent work. The student should choose one major subject, and not more than one minor subject, which should be related to the major ; or she may, if she prefers, do all her work in one subject.

One year is the shortest time in which a candidate can complete the work required, but it must be understood that only students of ability and maturity will be able to finish it in so short a time.

The work for the degree of Master of Arts will be tested by either examination or thesis, or both. Rules regarding examinations of resident students are fully stated in the graduate circular. Non-resident students will be examined in Wellesley during some one of the regular examination periods of the year in which the degree is to be conferred.

Thirty scholarships, as described on page 26, are open to accepted candidates for the Master's degree not residing in college buildings. Candidates residing in the college buildings will pay the full charge for board and tuition, \$400 per annum. Upon receiving the Master's degree a fee of twenty-five dollars will be required of each candidate.

Graduate students who have done the entire work for the M.A. degree in non-residence are accepted as candidates for the degree only when this work has been done at some institution which does not grant the M.A. degree to women, but a portion of the work may be done at any approved institution, including those which grant the M.A. to women. The diploma fee is the same for resident and for non-resident students.

Circulars containing fuller information concerning graduate work will be forwarded on application to the Dean of the College.

It is very desirable that applications for admission as graduate students be received by June 1st of the year in which the student wishes to enter.

STUDENTSHIPS GIVING OPPORTUNITY FOR STUDY ELSEWHERE THAN AT WELLESLEY.

Schools of Classical Study.

Wellesley College is a contributor to the support of the American School of Classical Studies in Athens, and the American School of Classical Studies in Rome, founded, in 1882 and 1895 respectively, by the Archæological Institute of America.

The object of these schools is to afford opportunity for the study of classical literature, art, and antiquities, to aid in original research in these subjects, and to conduct the exploration and excavation of classical sites.

The American School of Classical Studies in Athens.

The school year extends from October 1st to June 1st.

The regulations for admission are as follows: "Bachelors of Arts of co-operating colleges, and all Bachelors of Arts who have studied at one of these colleges as candidates for a higher degree, shall be admitted to membership in the School on presenting to the Committee a certificate from the classical department of the college at which they have last studied, stating that they are competent to pursue an independent course of study at Athens under the advice of the Director. Members of the school are subject to no charge for tuition."* Further information can be had by application to Professor Chapin, who represents Wellesley upon the Managing Committee of the School.

The American School of Classical Studies in Rome.

The school year extends from the fifteenth of October to the first of July. The regulations for admission are as follows: "Graduates in arts of American colleges and universities of good standing, and, under exceptional circumstances, other persons of marked qualifications, may be admitted as students of the School

on submitting to the Chairman of the Managing Committee, or to the Director of the School, satisfactory evidence that their previous studies have been of such a character as to fit them to profit by the opportunities that the School offers."*

Further information can be had by application to Associate Professor Hawes, who represents Wellesley upon the Managing Committee of the School.

The Marine Biological Laboratory at Wood's Holl.

Wellesley College is a contributor to the support of the Marine Biological Laboratory at Wood's Holl,—a region especially rich in forms of marine life, both vegetable and animal. This laboratory, which is open during the summer for the study of marine life, affords opportunities both to investigators and to persons needing either instruction or direction.

In the department of Botany courses are offered for the study of marine algæ, types of fungi, and the higher cryptogams.

In Zoology, regular courses of instruction are given in the anatomy of typical marine invertebrates and of the lower vertebrates. There are also courses in the embryology of fishes, in comparative physiology, and in comparative psychology, which are fitted for advanced students.

Students in either Botany or Zoology who desire to undertake original work will receive suitable direction. In addition to these opportunities there are courses of lectures on special topics, which are open to all students, and evening lectures on subjects of general biological interest.

Wellesley College holds the right to appoint annually two students, who are entitled to all the advantages of the Laboratory without expense for tuition. Applications for appointment to a studentship should state the character of the work to be done,—*i. e.*, whether botanical or zoological, whether general work, investigation under direction, or independent investigation,—and should be forwarded to Professor Hallowell or Professor Willcox, in time to reach Wellesley before April 1st.

The Zoological Station in Naples.

Wellesley College is a subscriber to the support of the American Women's Table at the Zoological station in Naples, and thus

* A few Fellowships of \$600 each are awarded on competitive examination.

has a voice in the selection of the persons who make use of it. Such persons must be capable of independent investigation in Botany, Zoology, or Physiology. Appointments are made for a longer or shorter period, as seems in each case expedient. Applications for the use of the table may be made through the President of the College.

III. GERMAN.

1. Elementary Course. Grammar, prose composition, reading, conversation, memorizing of poetry. *Open to all students. Freshmen four hours, all other students three hours per week for a year.*

Miss Mitzlaff, Miss Reuther.

2. Elementary Course. Topics as in course 1. *Open to all students who have completed course 1 or an equivalent. Freshmen four hours, all other students three hours per week for a year.*

Associate Professor Müller, Miss Mitzlaff, Miss Reuther.

Wenckebach's German text-books, Deutsche Sprachlehre, Lesebuch, Anschauungs-Unterricht, Die Schönsten Deutschen Lieder, and German Prose Composition are used in the above courses. Meissner's Aus meiner Welt, Dahn's Ein Kampf um Rom and Scheffel's Trompeter von Säckingen are read and translated. The aim of courses 1 and 2 is to give the student a knowledge of elementary German grammar in the German language, ability to understand with ease spoken German, to converse upon simple topics, and to translate easy German into English, and *vice versa*. Special attention is paid to the writing in German of the summaries of the topics read and discussed in the class, to the memorizing of choice lyric poetry, to the acquirement of a correct German pronunciation, and to the writing of the German script.

- *3. Scientific German. *Open to all students who have completed one or two full courses. Freshmen four hours, all other students three hours per week for a year.*

Miss Mitzlaff.

The object of this course is to give the student, through the medium of translation, such a knowledge of German as shall be useful in the study of the natural sciences.

4. Intermediate Course. *Open to all students who have completed the minimum B admission requirement in German. Freshmen four hours, all other students three hours per week for a year.*

Miss Mitzlaff, Miss Reuther.

This course is intended to fit students to enter courses 5, 6, 7. It is especially arranged for students who have no conversational knowledge of German.

* Not offered in 1901-1902.

5. Grammar and Composition (Intermediate Course). *Open to all students who have completed course 2 or 4, or who have met the maximum admission requirement in German. One hour per week for a year.*

Miss Mitzlaff, Miss Reuther.

Review of elementary grammar and study of more advanced grammar. Constant practice in prose composition and letter writing.

6. Schiller (Elementary Course). *Open to all students who have completed course 2 or 4, or who have met the maximum admission requirement in German. Freshmen two hours, all other students one hour per week for a year.*
Associate Professor Müller, Miss Mitzlaff, Miss Reuther.

The course includes lectures, reading, translations, and the memorizing of poetry. Schiller's life, with his early dramas, is made the basis of easy lectures and discussions in German, so that the student may become accustomed to follow an uninterrupted train of thought and learn to think connectedly in a foreign language.

7. Translation and Conversation (Intermediate Course). *Open to all students who have completed course 2 or 4, or who have met the maximum admission requirement in German. One hour per week for a year.*

NOTES.

1. The requirement in Philosophy for a degree is met by taking course 1 (first semester), followed by course 5 or 6 or 7 (second semester). Courses 5, 6, and 7 are also open as elective courses.

2. Courses 1, and 5 or 6 or 7 may often with great advantage be carried in the sophomore year. A student who wishes to take course 10, 11, or 12 as undergraduate work, can meet the prescribed conditions only by obtaining permission either to take this required work in the sophomore year, or to carry 8, 9, or 13 in the junior year, simultaneously with the required work.

3. By permission, the second semester of 9 and either semester of 8, 10, 11, 13, and 15 may be taken separately.

By permission, 8, 9, or 13 may be taken simultaneously with its prerequisites: courses 1, and 5 or 6 or 7.

4. Course 14 is required of students who are taking 15 for the first time. Course 15 may be repeated by a student who has not already taken the maximum number of hours offered; it then counts as three hours per week for either semester.

Associate Professor Kendall.

A study of the establishment and development of the English colonies in America, concluding with a detailed consideration of the conditions which led to a separation from the mother country.

- *11. Political Science. *Open to juniors and seniors. Three hours per week for a year.*

Associate Professor Kendall.

This is an introductory course in the comparative study of the origin, character, development, and aim of political institutions.

12. Growth of the British Empire. *Open to juniors and seniors who have completed two full courses in history. Three hours per week for the second semester.*

Associate Professor Kendall.

This course includes (1) a historical review of the development of the empire; (2) a study of the changes of colonial policy; (3) a study of colonial administration; and (4) a discussion of present colonial problems.

* Not offered in 1901-1902.

13. History of Rome from the earliest times to the barbarian invasions. *Open to sophomores, juniors, and seniors who have completed courses 1 and 2, or 3, or who have offered Roman History for admission. Three hours per week for a year.*

Miss Orvis.

A study of the development of Rome into a world power and its effects on her domestic institutions.

XI. ECONOMICS AND SOCIOLOGY.

1. Elements of Economics. *Open to sophomores, juniors, and seniors. Three hours per week for the first semester.*

Professor Coman.

An introductory course designed to give the student some acquaintance with economic facts and training in economic reasoning. Illustrations will be drawn from economic phenomena of American colonial history.

2. Industrial History of the United States. *Open to sophomores, juniors, and seniors who have had course 1. Three hours per week for the second semester.*

Professor Coman.

A study of the national development in its material and social aspect, accompanied by a critical review of our economic legislation, commercial and financial.

3. Industrial History of England. *Open to students who have completed two courses in Economics. Three hours a week for the first semester.*

Miss Balch.

A study of the development of methods of production, more especially of villeinage, guilds, the domestic system, and the introduction of machine industry.

- *4. Socialism. *Open to students who have completed courses 1 and 2. Three hours per week for the first semester.*

Miss Balch.

A study of socialist theories, "Utopian" and "Scientific," in their historical development, with some consideration of modern socialist parties, and especially of German Social Democracy.

* Not offered in 1901-1902.

- *5. Statistical study of certain economic problems in the industrial history of the United States. *Open to students who have completed courses 1 and 2. Three hours per week for the first semester.*

Professor Coman.

The course is introduced by lectures on the principles of statistical research. Each member of the class undertakes the investigation of a particular problem, and reports the results of her inquiry to the class. The graphic method of presenting statistical results is emphasized.

6. Social Economics I. *Open to juniors and seniors who have completed two courses in Economics. Three hours per week for the first semester.*

Miss Balch.

A study of the delinquent, defective, and dependent classes, accompanied by discussion of methods of dealing with each.

7. Social Economics II. *Open to juniors and seniors who have completed two courses in Economics. Three hours per week for the second semester.*

Miss Balch.

A discussion of methods of meeting certain normal social needs, such as housing, sanitation, education, recreation, and thrift.

8. The Modern Labor Problem. *Open to students who have completed two courses in Economics. Three hours per week for the second semester.*

Miss Balch.

A study of the various remedies, proposed or tried, for the difficulties of the modern industrial situation; modifications of or substitutes for the wage system, such as profit-sharing, co-operation and socialism, trade unionism and arbitration, labor legislation, insurance and pension schemes, and "employers' welfare institutions." American experience will be emphasized.

9. An Introduction to General Sociology. *Open to juniors and seniors who have completed two courses in Economics. Three hours per week for the year.*

Miss Balch.

A study of facts and theories of social development, and more especially of the growth of institutions such as the family, the State, law and property.

A reading knowledge of French and German is desirable.

* Not offered in 1901-1902.

- †10. Public Finance. *Open to students who have completed courses 1 and 2 in Economics. Three hours per week for the year.*

Professor Coman.

First semester: economic functions of the State, problems of revenue and expenditure; second semester: problems in municipal finance.

11. Business Methods and Business Law. *Open to all students. One hour per week throughout the year.*

Miss Cook.

This course is intended to train women to deal intelligently with ordinary business situations. Class work will be supplemented by illustrative lectures from practical business men.

XII. PURE MATHEMATICS.

1. Required course for freshmen. *Four hours per week for a year.*

(a) Solid and Spherical Geometry. *Three hours, first semester.*

(b) Higher Algebra. *One hour first semester; two hours second semester.*

The subjects included are: Functions and Theory of Limits, Derivatives, Development of Functions in Series, Convergency of Series, Theory of Logarithms, Determinants, Theory of Equations (including Sturm's Theorem). (Taylor's College Algebra.)

(c) Plane Trigonometry. *Two hours second semester.*

The angular analysis, including transformations, trigonometric equations and inverse functions, is fully treated, as well as the solution of triangles and the practical use of the tables.

Associate Professor Chandler, Miss Denis, Dr. Vivian,
Miss Langford.

2. Conic Sections and Plane Analytical Geometry. *Open to students who have completed course 1. Three hours per week for a year.*

Professor Burrell, Associate Professor Chandler.

A brief course in geometrical conics is given in connection with the usual analytical work.

3. Differential and Integral Calculus. *Open to students who have completed course 2. Three hours per week for a year.*

Professor Burrell.

† Withdrawn for the current year.

One hour per week during the second semester will be given to lectures on topics from analytical trigonometry of general value in analytical work.

- †4. Theory of Equations, with Determinants (Burnside and Pantan). *Open to students who have completed course 3. Three hours per week for the first semester.*

Associate Professor Chandler.

- †5. Solid Analytical Geometry (C. Smith). *Open to students who have completed course 3. Three hours per week for the second semester.*

Associate Professor Chandler.

- *8. Projective Geometry. *Open to seniors who have completed course 2, and to juniors by permission of the instructor. Three hours per week for a year.*

Professor Burrell.

A lecture course, following the general method of Reye's *Geometrie der Lage*.

- †9. Differential Equations (Johnson). *Open to students who have completed course 4. Three hours per week for the second semester.*

Associate Professor Chandler

6. Modern Synthetic Geometry. *Open to students who have completed course 2. Three hours per week for a year.*

Professor Burrell.

Metrical and projective properties of plane and sheaf forms of the first and second orders; the anharmonic ratio; harmonic forms; the method of inversion; involution; collineation; the law of duality; theory of poles and polars; reciprocation; space forms and surfaces of the second degree. Given by lectures and references.

- †10. Differential Equations (Forsyth). *Open to students who have completed course 4. Three hours per week for a year.*

Associate Professor Chandler.

Advanced course, intended primarily for graduate students.

* Not offered in 1901-1902.

† Withdrawn for the current year.

XIII. APPLIED MATHEMATICS.

1. Introduction to the Mathematical Treatment of Science.
Open to sophomores, juniors, and seniors. Three hours per week for a year.

Professor Hayes.

2. Practical Astronomy. *Open to sophomores, juniors, and seniors. Three hours per week for a year.*

Professor Hayes.

Spherical co-ordinates, time, latitude, longitude, the ecliptic, parallax.

Practical work in the Observatory accompanies the theoretical treatment of each subject.

- †3. Thermodynamics. *Open to students who have completed course 1. Three hours per week for the second semester.*

Professor Hayes.

A lecture course, mathematical in form, designed to accompany Maxwell's *Theory of Heat*.

- †4. Theoretical Mechanics. *Open to students who have completed course 1. Three hours per week for the first semester.*

Professor Hayes.

This course is a continuation of course 1, and is devoted to the further development of the principles of kinematics, statics, and kinetics.

- †5. Geodynamics. *Open to juniors and seniors properly qualified. Three hours per week for the second semester.*

Professor Hayes.

Both the astronomical and geological aspects of the subject are emphasized. In general, the topics discussed are: precession, nutation; form, size, density of the earth; thermal condition of the earth, theories concerning its crust.

6. Theory of Orbits. *Open to students who have completed courses 1 and 2, and also course 7 in the Department of Physics and Physical Astronomy. Three hours per week for a year.*

Professor Hayes.

The treatises of Watson, Oppolzer, and Tisserand are used for reference. Determination of a parabolic orbit.

† Withdrawn for the current year.

7. Logic. *Open to juniors and seniors. Three hours per week for a year.*

Professor Hayes.

An examination of the principles of correct thinking and of the methods of science. Materials for study are drawn from masterpieces of scientific writing and from current scientific literature.

XIV. CHEMISTRY.

1. General Chemistry. *Open to all undergraduates. Freshmen four hours per week for a year; all other students three hours per week for a year.*

Associate Professor Bragg, Miss Penny.

Course 1 is for beginners in Chemistry, and is intended to familiarize the student with the important properties of the elements—especially the non-metallic ones—and their compounds; with their modes of preparation, and with such tests as shall lead up to the study of systematic Qualitative Analysis; also to present the laws governing chemical reactions, the meaning of chemical equations, and the more recent theories adopted in the science.

All of the more simple experiments are performed by the student herself in the laboratory.

2. Qualitative Analysis. *Open to students who have completed course 1. Three hours per week for the first semester.*

Miss Jackson.

This course supplements course 1 by presenting the properties and characteristic reactions of the metallic elements. Practical methods of separating and recognizing the elements present in simple mixtures are taught, and the progress of the student is constantly tested by the examination of simple substances, the exact composition of which is unknown to the student.

3. Organic Chemistry. *Open to students who have completed course 1. Three hours per week for the second semester.*

Professor Roberts, Miss Penny.

This course includes a somewhat careful study of the saturated series, dealing very briefly with the unsaturated and benzene series. Experiments are performed in the laboratory to illustrate the behavior of representative substances, and a limited number of preparations are made to familiarize the student with the more common processes of Organic Chemistry.

4. Advanced General Chemistry and Qualitative Analysis. *Open to freshmen who have met the admission requirement in Chemistry. Four hours per week for a year.*

Miss Jackson.

5. Quantitative Analysis. *Open to students who have completed course 2 or 4. Three hours per week for the second semester.*

Miss Jackson.

In this course a few typical processes involving both volumetric and gravimetric methods will be taught, to illustrate general principles of Quantitative Analysis.

6. Air, Water, and Food Analysis. *Open to students who have completed course 1 or 10, 2 or 4, 3 or 7, and 5. Three hours per week for the first semester.*

Associate Professor Bragg.

7. Organic Chemistry, with laboratory work in organic preparations. *Open to students who have completed two years' work in Chemistry. Three hours per week for a year.*

Professor Roberts, Miss Penny.

8. Theoretical Chemistry. *Open to students who have completed course 1. Three hours per week for the first semester.*

Professor Roberts.

9. Stereo-Chemistry and Laboratory work in connection with Theoretical Chemistry. *Open to students who have completed courses 3 or 7, and 8. Three hours per week for the second semester.*

Professor Roberts, Associate Professor Bragg.

XV. PHYSICS AND PHYSICAL ASTRONOMY.

1. General Physics. *Open to all undergraduates. Freshmen four hours, others three hours per week for a year.*

Miss Davis, Miss Langford.

This course is intended for students who are beginning Physics. It consists of lectures amply illustrated, followed by laboratory work. The object is to outline the elementary principles of Mechanics, Sound, Electricity, and Light, to train the powers of observation, and to teach proper methods of recording observations.

2. Laboratory Work. *Open to sophomores, juniors, and seniors, by permission of the department. One hour per week for a year.*

Miss Davis.

3. Heat, Light, and Electricity. *Open to students who have completed course 1 or an equivalent. Freshmen four hours, all other students three hours per week for a year.*

Miss Langford.

The course is intended, by experimental work and consultation of original memoirs, to acquaint the student with the methods of original investigation; also to give practice in the preparation of subjects and their presentation before others, with suitable illustration.

The course is desirable for all who wish to prepare to teach Physics.

- †4. Selected subjects in Light and Electricity, mathematically treated. *Open to seniors who have completed course 3, and also course 3 in Pure Mathematics. Three hours per week for a year.*

Miss Langford.

Text-books: Preston's Theory of Light, and J. J. Thomson's Mathematical Theory of Light and Electricity.

- †5. Advanced Laboratory Work. *Open to students who have completed course 3. Three hours per week for a year.*

Professor Whiting.

Advanced work upon the spectrum, polarized light, interference phenomena, absolute measurements in electricity and magnetism. Special problems assigned; constant reference to original sources.

- †6 Meteorology. *Open to sophomores, juniors, and seniors. One hour per week for a year.*

Professor Whiting.

Text-book: Davis's Meteorology. The course is accompanied by constant reference to original papers, by the solution of inductive problems from the weather maps and records of observations. Familiarity is gained with the use of standard instruments, including the self-recording thermometer, barograph, anemometer, and anemoscope.

- †7. Physical Astronomy. *Open to sophomores, juniors, and seniors. Three hours per week for a year.*

Professor Whiting, Professor Hayes.

† Withdrawn for the current year.

† An elementary course in Physics, either in college or in secondary school, is prerequisite to courses 6 and 7.

Text-book: Young's General Astronomy. Ample opportunity for laboratory work is offered by the Whitin Observatory, where dome, transit, and spectroscope rooms are provided with instruments for both the astronomy of measurement and astrophysics.

XVI. GEOLOGY AND MINERALOGY.

1. Geology. *Open to sophomores, juniors, and seniors. Three hours per week for a year.*

Professor Niles, Professor Hayes, Miss Fisher.

Lectures, recitations, and field work. Subjects treated: Dynamical Geology, Structural and Historical Geology.

A systematic and comprehensive study of the more important teachings of geological science.

2. Mineralogy. *Open to sophomores, juniors, and seniors. Three hours per week for the first semester.*

Dr. Warren.

Lectures and recitations. Laboratory study of sets of specimens of the more important mineral species. Blow-pipe analysis. Crystallography. A reference collection is always available for students' use.

3. Advanced Geography. *Open to students who have completed one year of science. Three hours per week for the second semester.*

Miss Fisher.

Lectures and recitations. This course comprises a comparative study of the geographic features of the continents with their natural and political divisions. It also discusses the influence which these features have upon the life, habits, prosperity, and commercial relations of peoples and nations.

- †4. Structural Geology and Field Work. *Open to students who have completed course 1. Three hours per week for a year.*

Miss Fisher.

Lectures, discussions, and field study. The aim of the course is to give a thorough knowledge of Structural Geology, with practice in applying the principles to the interpretations of the geology of selected localities.

† Withdrawn for the current year.

XVII. BOTANY.

1. General Comparative Morphology and Principles of Classification. *Open to all undergraduates. Freshmen four hours per week for a year; all other students three hours per week for a year.*

Associate Professor Cummings, Associate Professor Cooley,
Dr. Ferguson.

This course is introductory to all the other courses in Botany. It includes an outline study of plant structure and development, with the fundamental laws of biology as exemplified in plants, their relation to environment and to other living beings, both plants and animals.

A herbarium of fifty specimens is required. Recitations and lectures, accompanied by parallel studies in the laboratory and field.

2. Cryptogamic Botany. *Open to students who have completed course 1. Three hours per week for a year.*

Associate Professor Cummings.

A study of the morphology, reproduction, and development of the lower forms of plant life.

In the autumn special attention is given to the study of mushrooms, both in field and laboratory, with reference to poisonous and edible forms. In the spring term each student makes choice of some group, as ferns, for individual study. It is intended that this course shall supplement Botany 1 in giving a general survey of the plant kingdom.

3. Systematic and Economic Botany. *Open to students who have completed course 1, and to others upon advice of the professor. Three hours per week for a year.*

Associate Professor Cooley.

This course includes a study of the special morphology, ecology, and classification of flowering plants. Stress is laid upon the relation of habit and structure to external conditions of life. Living plants are studied as individuals and as members of plant communities. An important part of the course is the study of plant products and their uses.

The work is conducted in the laboratory, field, and greenhouse.

- *4. Medical Botany. *Open to students who have completed courses 10 and 11. Three hours per week for a year.*

Associate Professor Cooley.

* Not offered in 1901-1902.

Microscopical examination of the typical and important roots, rhizomes, stems, leaves, barks, and fruits of the Pharmacopœia. This course is intended to give familiarity with the botanical characters of the more common medicinal plants, thus aiding in the identification of the crude drugs derived from them and in the detection of adulterations. The active principles of such drugs, and peculiar modes of action, are also investigated.

- *6. Plant Biology. *Open to students who have completed course 2. Three hours per week for a year.*

Associate Professor Cooley.

Gross anatomy, histology, and physiology of a series of plants, considered as types, proceeding from the simpler to the more complex organisms. Special attention will be given to tracing the development of organs and the evolution of forms.

- *7. Embryology and other special topics. *Open to students who have completed courses 10 and 11. Three hours per week for a year.*

Professor Hallowell.

This course is to be pursued with a view to original research and a thorough acquaintance with the literature of the subject. A thesis is required of each student.

8. Advanced Cryptogamic Botany. Systematic study of any chosen group or groups of Cryptogams. *Open to students who have completed course 2. Three hours per week for a year.*

Associate Professor Cummings.

9. Trees and Forestry. *Open to students who have completed course 1. Three hours per week for a year.*

Associate Professor Cooley.

A study of the anatomy and physiology of trees, their products and uses, their relations to climate. Protection of woodlands and forest regulations.

10. Comparative Histology of Plants and Microscopical Technique. *Open to students who have completed course 2. Three hours per week for the first semester.*

Dr. Ferguson.

A study of cell structure, cell contents, plant tissues, and development of the Phanerogams.

Special attention is given to the technique of the microscope and to microchemical methods of staining and testing.

* Not offered in 1901-1902.

11. Plant Physiology. *Open to students who have completed course 10. Three hours per week for the second semester.*

Dr. Ferguson.

The lectures in this course take up in detail the more important problems of plant physiology, including heredity and the biological adaptations of plants to their surroundings.

The laboratory study consists of experimental work in plant physiology.

A knowledge of the elements of Physics and Chemistry is very desirable for courses 10 and 11.

XVIII. ZOOLOGY AND PHYSIOLOGY.

1. General Biology. *Open to freshmen and sophomores. Freshmen four hours, all other students three hours per week for a year.*

Miss Bowers, Dr. Thompson, Miss Foote.

In this course emphasis is laid on the fundamental unity of plants and animals. The general principles underlying all life are studied by means of field work, laboratory work, and lectures. A study is made of a typical animal, the frog, and also of a typical plant, the bean, in order to compare the morphology and physiology of the two kingdoms. Development is studied in the life history of the frog. A brief comparative study is made of lowly plants and animals.

This course is intended to train students in accuracy of observation and in methods of scientific work.

2. General Zoology. *Open to sophomores, juniors, and seniors. Three hours per week for a year.*

Professor Willcox.

Comparative study of all the great groups (phyla) of animals, beginning with unicellular organisms and concluding with mammals. Also a few lectures on vertebrate embryology.

This course aims to present the outlines of animal structure and classification, and to give familiarity with the commoner forms.

Course 1 and 2 together will meet the admission requirement in biology of the Johns Hopkins Medical School.

3. Anatomy of the Cat. *Open to students who have completed course 1 or course 2. Three hours per week for the first semester.*

Miss Bowers.

This course is intended to train students in careful dissection. It is especially fitted for those who intend to study medicine. Constant

reference will be made to human anatomy, and a lightening of the ordinary course* in that subject in a medical school can be effected by taking this work.

4. Embryology of the Chick. *Open to students who have taken or are taking course 2. Three hours per week for the second semester.*

Miss Bowers.

This course, by a thorough study of the development of the chick, introduces the student to the general principles of embryology. Training is given in the mounting of embryos and in the preparation of serial sections.

- *5. Natural History of Animals. *Open to students who have completed or are taking course 2. Three hours per week for a year.*

Professor Willcox.

Collection and classification of animals; study of habits; readings in natural history; excursions to neighboring museums; microscopic mounts of minute animals.

6. Zoological Seminary. *Open under the advice of the professor to students who have completed two full courses. Three hours per week for a year.*

Professor Willcox.

Readings and discussions of Darwin, Spencer, Wallace, Weismann, and kindred authors. One careful paper on a biological subject prepared by each student.

9. Animal Histology and Histological Technique. *Open to students who have completed course 1 or course 2. Three hours per week for a year.*

Dr. DeLue.

Lectures on cellular histology and physiology. Laboratory work, including thorough training in the manipulation of the microscope and in the methods of histological preparation, as well as the study of prepared specimens. A considerable lightening of the ordinary course in histology as given in a medical school can be effected by taking this work.

- *10. Animal Physiology. *Open to students who have completed course 1 or course 2. Three hours per week for a year.*

Lectures and laboratory work dealing with experimental and theoretical questions in physiology, such as the structure and action of muscle, nerves, blood vessels, the heart, blood, the formation and action of digestive juices, excretion, metabolism, the special sense

* Not offered in 1901-1902.

organs, the brain, etc. Each student arranges and uses the apparatus necessary for almost all experiments; but some of the more difficult are performed by the instructor, assisted in turn by the different members of the class.

Apparatus needed by students in this department. Microscopes, reagents, etc., are provided by the college. Certain dissecting instruments may be rented from the college; others must be provided by the students.

The instruction in all courses of the Zoology department, except 6, is given through practical work in the laboratory, accompanied by lectures, three appointments per week, one hour and a half each. Course 6 requires no laboratory work, and the appointments are forty-five minutes each.

HYGIENE.

1. Physiology and Hygiene. *Required of freshmen. One hour per week for a year.*

Miss Sherrard.

Lectures, demonstrations, and quizzes.

The subject presented is the proper care of the body, and the course is designed to give a practical knowledge of its structure and an understanding of the laws of life and health. An outline is also given of the general principles of public hygiene.

XIX. PEDAGOGY.

1. Science of Education. *Open to juniors, seniors, and graduates. Three hours per week for a year.*

Associate Professor Carlisle.

This course attempts to base principles of education upon the data of science. It sketches rapidly the civilizing and educative influence of the arts of primitive peoples. It studies educational processes at various stages of the child's development, and considers educative material suitable at different periods of his life. This course also includes a general study of the child's growth and physique, and it presents school hygiene in detail.

2. History of Education. Educational theories. *Open to juniors, seniors, and graduates. Three hours per week for a year.*

Associate Professor Carlisle.

This course aims to present a general view of the great movements in education; to trace the development of its institutions, and to select characteristic features of its accepted systems. Emphasis is

placed on modern educational theories. The child-study movement is considered. Detailed studies are made of certain practices and problems of the American public schools of the present time.

NOTE.—Course 1 is recommended to students who are specializing in the departments of science, philosophy, mathematics, or art. Course 2 is designed primarily for students who are specializing in language, literature, or history.

It is expected that courses open to graduates only will be added.

XX. BIBLIOGRAPHY.

1. Bibliography. *Open to sophomores, juniors, and seniors. One hour per week for a year.*

Miss Godfrey.

This course aims to familiarize the student with the best bibliographical works and with library methods and catalogues, to teach the best methods of reaching the literature of a special subject, and to furnish important bibliographical lists likely to prove valuable in future study. It will prove especially helpful taken in connection with courses in English literature, philosophy, history, economics, and the history of art.

XXI. ELOCUTION.

1. Training of the Body and Voice. *Open to sophomores, juniors, and seniors; to freshmen by special permission. Two hours per week for a year.*

Miss Bennett.

Body; poise and bearing. Voice; correct method of breathing, etc. Reading, with special reference to a good use of the voice. Recitations.

2. Training of the Body and Voice. Expression. *Open to students who have completed course 1, or an equivalent course. Two hours per week for a year.*

Miss Bennett.

Voice culture; exercises for freedom of body; gesture; recitations from the best authors; reading at sight.

3. Reading of Shakespeare. *Open to students who have completed course 1 or 2, or to those who have completed or are taking English Literature 9; to others at the discretion of the instructor. Two hours per week for a year.*

Miss Bennett.

Analysis of characters, reading, scenes selected for memorizing.

XXII. ART.

- *†1. History of Architecture. From the earliest times to the year 1000 A.D. *Open to juniors and seniors, and to sophomores by permission of the instructor. Three hours per week for a year.*

Mr. Holt.

2. Outline History of Greek Sculpture. *Open to sophomores, juniors, and seniors. Three hours per week for a year.*

Dr. von Mach.

- †3. History of Italian Painting through the Fifteenth Century. *Open to sophomores, juniors, and seniors. Three hours per week for a year.*

Miss Keyes.

In this course the development of Italian painting will be traced from the early mosaics to Botticelli and Mantegna; critical study will be given to the position and quality of the artists, as well as to the characteristics and relations of the different schools.

5. Studio Practice. *Open to sophomores, juniors, and seniors. One hour per week for a year.*

Professor Brown, Mr. Woodbury.

Drawing, sketching and color-work. No prerequisites.

- 5a. Studio Practice. *Open by permission of the instructor to students who are taking or have completed Art 5. One hour per week for a year.*

Professor Brown, Mr. Woodbury.

- 5b. Studio Practice. *Open by permission of the instructor to students who are taking or have completed Art 5a. One hour per week for a year.*

Professor Brown, Mr. Woodbury.

Conduct of these courses same as that of 5.

The studio courses count toward the degree after one course in the History of Art has been completed.

- *6. Theory and Practice. *Open by permission of the instructor to students who have completed a course in Art. Three hours per week for a year.*

Professor Brown.

* Not offered in 1901-1902.

† Courses 1 and 9, and 3 and 10 are alternate courses; they will not both be given in the same year.

7. History of Greek Sculpture. Seminary. *Open to graduates and seniors, and by permission of the instructor to students who have completed Art 2. Three hours per week for a year.*

Dr. von Mach.

In this course one limited period of Greek sculpture will be carefully studied. Subject for 1901-1902: The Fifth Century B. C. with work in other periods for comparative purposes.

A part of the work will be carried on in the Museum of Fine Arts in Boston.

All must read in preparation "Handbook of Greek Sculpture," by Ernest A. Gardner.

8. History of Italian Painting. Seminary. *Open to students (to juniors by special permission) who have completed Art 3, and to others by permission of the instructor. Three hours per week for a year.*

Miss Keyes.

The aim of this course is to study a given epoch in detail, and to train students for independent work. The subject in 1901-1902 is Titian, his quality, environment, technique, and relation to other artists of his century. In preparation for this course an acquaintance with the outline of the history of Italian painting is required.

- †9. History of Architecture from the year 1000 to the present time. *Open to juniors and seniors, and to sophomores by permission of the instructor. Three hours per week for a year.*

Mr. Holt.

The aim of this course is to give a general view of the development of styles and a thorough understanding of their essential elements, both constructive and decorative, during the period studied.

First semester. Introduction to the subject, and history of architecture during the Romanesque and Gothic periods, from 1000 A. D. to the Renaissance.

Second semester. Architecture from the beginning of the Renaissance to the present time.

- *†10. History of Italian Painting during the Renaissance. *Open to sophomores, juniors, and seniors. Three hours per week for a year.*

Miss Keyes.

* Not offered in 1901-1902.

† Courses 1 and 9, and 3 and 10 are alternate courses; they will not both be given the same year.

11. An Outline Course in the History of Art. *Open to sophomores, juniors, and seniors. One hour per week for a year.*

Professor Brown.

This course furnishes an outline of the general development of styles in architecture, sculpture, and painting from earliest times up to the present. This course is complete in itself, but it may be taken in preparation for other courses. This course is not open to students who have taken or are taking two other courses in the Art Department.

Students in art courses are required to use laboratory methods, examining and comparing, sketching or describing the photographs used in illustration.

Previous preparation in drawing is not required, but it is desirable that all students who intend to take courses in Art should be prepared to present specimens of any drawing that they may have done.

The art library is open to students from 9 to 5.30 daily, and from 7 to 9 in the evening.

N. B. Any student who desires to give yearly the time of one full course to studio work throughout her college course may do so by spending five years in college before taking her degree instead of four.

XXIII. MUSIC.

I. Theory.

The following courses count toward the bachelor's degree. They may be elected by students not taking instrumental or vocal music, and are subject to no separate tuition fee. In the case of students who are taking vocal or instrumental music, course 1 may be profitably followed by courses 6, 7; students who wish to make their music study general rather than technical may elect course 4.

1. Harmony. *Open to sophomores, juniors, and seniors. Three hours per week for a year.*

Professor Macdougall.

This course covers notation, the study of intervals and scales, the formation and interconnection of chords, modulation, non-harmonic tones, analysis of harmony in standard works. Exercises in harmonizing basses and melodies and in ear training.

6. Counterpoint. *Open to students who have completed course 1 (or its equivalent). Three hours per week for the first semester.*

Professor Macdougall.

Counterpoint in two, three, and four voices; double counterpoint; analysis of examples from standard works.

7. Musical Form. *Open to students who have completed course 6. Three hours per week for the second semester.*

Professor Macdougall.

A study of the simple musical sentence and its development into the various forms of instrumental and vocal music; emphasis being laid on the larger forms (partita, suite, sonata, symphony, overture, aria, mass, oratorio, etc.); analysis of standard compositions. Opportunity for original work will be given.

4. The development of the art of Music. *Open to sophomores, juniors, and seniors. Three hours per week for a year.*

Professor Macdougall.

A course in the appreciation of music, intended to develop musical perception and the ability of listening intelligently to music.

First semester: the evolution of rhythm, harmony and melody; their power and office in musical expression; the principal musical forms. Second semester: studies of the famous composers, their lives, their strongest works, their relation to the progress of musical art. Some great work will be selected for special study throughout the year. No previous knowledge is necessary. This course may follow 1 or 7, or be taken independently.

A limited number of tickets to the Boston Symphony Concerts will be given to students who are able to use them profitably.

II. Instrumental and Vocal Music.

Freshmen may take vocal or instrumental music without courses in Musical Theory. All other students who wish to take vocal or instrumental music must elect at the same time a course in Musical Theory, unless they have previously completed two full courses in the subject.

Training in instrumental or vocal music does not count toward a degree; but any student who completes the prescribed courses in Pianoforte, Organ, or Voice, as described on the following page, will receive the certificate of the Department of Music. For terms see p. 25.

Candidates for the certificate of the Department of Music may devote all their time to music, except that which is given to three academic studies, including a course in Biblical History. Candidates for admission must meet requirements 1, 2, 3, pp. 32 to 35, and must also present the maximum preparation

in either Latin, Greek, French, or German. The time occupied in study for a certificate depends upon the proficiency of the pupil, but in general four years are needed.

Candidates for the B.A. degree may take a course in vocal or instrumental music in connection with their regular academic work, but in this case five years are required for the completion of the courses requisite to the degree.

Special students who do not wish to become candidates for the certificate may arrange for courses combining music with academic work, but it is expected that such students will take at least two lessons per week in either instrumental or vocal music. The requirements for admission are the same as those prescribed above for candidates for the music certificate.

Those who are suitably qualified may pursue musical studies exclusively, without being otherwise connected with the College. For such students special arrangements may be made.

Certificate of the Department of Music.

Any student in the College who completes any one of the following courses of study will receive the certificate of the Department of Music :—

A. Pianoforte : two lessons a week, with periods of practice daily for six days each week.

Academic subjects : from six to eight hours a week throughout the course, including Musical Theory (courses 1, 6, and 7), modern language, and Biblical History.

B. Organ : two lessons a week with daily practice, as in piano study. Academic subjects as in *A.*

C. Voice : two lessons a week with daily practice. Academic subjects as in *A.*, but the modern languages pursued must include Italian, which should be taken as early as possible, that the student may have the benefit of the subject throughout the course.

Violin, Viola, Violoncello, Harp, or any orchestral instrument may be made a specialty instead of the above-mentioned principal studies.

 Students intending to apply for the certificate of the Department of Music must give at least a year's notice.

Pianoforte.

Those who make pianoforte their specialty, and wish to obtain a certificate, should upon entering be familiar with correct phrasing, staccato and legato touch, the ordinary musical signs, *and their application*; should show technical proficiency, and should present the following work or its equivalent: Czerny, Op. 299, three books; Loeschhorn, Op. 66, three books; Bach, Preludes; and two or three sonatas by Haydn and Mozart.

The course will be adapted to the particular needs of the student, but will be so arranged that the student upon its completion shall have a fundamental knowledge of the best works in pianoforte literature: Bach, Händel, Mozart, Haydn, Beethoven, Schubert, Schumann, Weber, Mendelssohn, and Chopin, as well as the different schools of modern writers.

Attention will also be given to four-hand playing and, for those who are sufficiently advanced, to playing with other instruments.

Organ.

To obtain the certificate organ pupils must begin with a good knowledge of pianoforte technique.

The course includes the most important of the Bach works, the Preludes and Fugues and Sonatas of Mendelssohn, selections from Rheinberger, Merkel, Thiele and others of the modern German school; compositions by Guilmant, Saint-Saens, Widor, Gigout, Salome, and others of the French school; Smart, Turpin, Best, Lemare, Wolstenholme, Hollins and others of the English school; Buck, Whiting, Whitney, Foote, Parker and others of the American school.

Constant reference will be made to the use of the organ in church.

NEEDS OF THE COLLEGE.

Wellesley College, established by private benevolence, entered upon its work with a costly material equipment, but with no endowment in money.

The endowment of the library by Mr. E. N. Horsford, the later contributions of Mr. Rockefeller and others to general and special endowment, have greatly relieved the burden resting upon

the College. Yet to-day the receipts from board and tuition fees form the main resource with which to meet running expenses and annual repairs, and to make those additions to apparatus and buildings which are demanded by the constant advance and expansion of college instruction throughout the country.

It must be evident that the past outlay has been amply justified by results. Notwithstanding the peculiar dependence of the College upon the number of students admitted and retained, the first twenty-six years of its existence have been attended by a constant rise in the academic standard. From Wellesley have been graduated over nineteen hundred young women, who have carried the fruits of their college training into the schools and households of their country, and into benevolent and Christian work at home and abroad. It is believed that the College can with full confidence appeal to the public at large for further aid.

Among the urgent needs of the College are the following :—

1. Unrestricted funds for defraying general expenses.
2. A library building.
3. A science building.
4. A gymnasium building.
5. The endowment of the presidency and professorships.

FORMS OF BEQUEST.

I give and bequeath to Wellesley College, a corporation established by law, in the town of Wellesley, county of Norfolk, and Commonwealth of Massachusetts, the sum of ——— dollars, to be appropriated by the Trustees for the benefit of the College in such manner as they shall think will be most useful.

I give and bequeath to Wellesley College, a corporation established by law, in the town of Wellesley, county of Norfolk, and Commonwealth of Massachusetts, the sum of ——— dollars, to be safely invested by it, and called the ——— Scholarship Fund. The interest of this fund shall be applied to aid deserving students in Wellesley College.

I give and bequeath to Wellesley College, a corporation established by law, in the town of Wellesley, county of Norfolk, and Commonwealth of Massachusetts, the sum of ——— dollars, to be safely invested by it, and called the ——— Endowment Fund. The interest shall be applied to the payment of the salaries of teachers in Wellesley College, as the Trustees shall deem expedient.

HONOR SCHOLARSHIPS.

Honor Scholarships (without stipend) have been established by the College for the purpose of giving recognition to a high degree of excellence in academic work. These honors fall into two classes: students in the first, or higher class, are termed Durant Scholars; students in the second class are termed Wellesley College Scholars.

These honors are awarded to seniors on the basis of three and one-half years' work, to juniors on the basis of two and one-half years' work. The standard in each case is absolute not competitive.
